Composite condenser with trumpet-shaped working ends is helpful for a dense application he removes easily and fast excess material.

Composite condenser with flat working ends is helpful for a dense application in the cavity base

Pear-Shaped Composite condenser facilitates your work when condensing the composite Material inside the cavity.

Double-ended composite micro spatula
for the finishing work of the cavity

Double-ended composite micro spatula for various applications. The flexible working ends are aligned opposite and enable an easier preparation with composite material when applying into the cavity by giving a better view into the operating area.
